Capacity: 4-7

Use Zone: 14' 3" x 20' 11"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Single Post Overhead Inverted Horizon Climber with Rope Attachment is two challenging climbers in one. Kids will first approach the tightly woven grid of strong steel ropes wrapped in nylon. Once they have ascended the first element, they will reach the inverted overhead climber on top. The combination of these two components creates a demanding full body exercise during play, making a positive impact on overall health and wellness. This commercial-grade structure is designed to safely bear the weight of multiple children, encouraging tikes to play together and make new friends. The many clambering youngsters scaling this installment also forces individuals to maneuver around the other climbers, promoting problem-solving and fostering cognitive development. The slim design allows this piece of equipment to fit into small spaces and makes an excellent addition to new or existing playgrounds. The two supportive galvanized steel poles are powder-coated and can be painted one of our many color options.
