COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Single Post Tilted Lily Pad Bridge is the perfect combination of intrigue and safe simplicity. The stepping platforms are rotational molded plastic with texture built in to help shoes grip the surface. This bridge design is meant to present a gentle challenge that won't overwhelm the youngest school-age children. Six platforms are lined up slightly askew and secured to the ground to create an interesting attraction that keeps kids on their toes. As little ones hop along the varying steps and steady themselves, they are improving their balance and coordination. As youngsters conquer the mild obstacle, they will get a boost of confidence and may seek more ambitious playground endeavors. In conjunction with other Get Physical units, this bridge encourages a healthy appreciation for exercise. Contact the sales team at AAA State of Play to customize this installment to suit the color scheme of your school, park or playground.
