Use Zone: 16' 3" x 20' 10"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Add a fun physical challenge to your play area with the Freestanding Curved Post Overhead Horizon Climber. Featuring a modern twist on the traditional monkey bar design, this climber displays an oval shaped overhead frame enlaced with easily graspable rungs. The unit will test a child's upper body strength and hand-eye coordination as they travel from end to end. Not only will it challenge their physical abilities, but the climber will also stimulate young minds. Kids can get creative as they pretend they are swinging from branch to branch in the jungle or racing through an obstacle course. As a versatile installation, this climber can be used to create a flow from two different play structures or it can serve as a stand-alone unit. Four curved posts offer sturdy support that can handle heavy use from multiple children habitually playing. Two horizontal bars are located at the bottom of the posts to help kids better reach the overhead rungs and start or end their journey. Contact a AAA State of Play salesperson for more details and learn how to customize the color of the unit to match your venue.
