CPSC PUB #325

Kids can pretend they are crossing a rickety bridge over a rocky cliff or hopping along the rocks of a raging river. All sorts of imaginative play is possible on the Freestanding Curved Post Pebble Bridge by Playground Equipment Dot-com. This popular element is made up of six steps at varying heights designed to gently test balance, coordination and body control. These platforms are made from rotational molded plastic with a raised texture on top that assists with grip and reduces the risk of slipping. Multiple children can play at once, encouraging them to maneuver around each other and progress their planning, problem-solving and spatial awareness abilities. Elements like the Pebble Bridge provide an enjoyable play experience while simultaneously encouraging physical wellness. Sturdy galvanized steel poles are powder-coated for rust resistance and painted to suit your unique playground. Just contact the sales team at AAA State of Play to learn more about color options.
