Capacity: 3-6

Use Zone: 16' 3" x 20' 2"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Playground Equipment Dot-com's Freestanding Curved Post Net Bridge is a multifunctional commercial-grade recreation product that works well for independent play or as a transition point between existing structures. The bridge's frame is built of rugged galvanized steel and the roping is nylon encased steel cabling. The cabling has a slight give to it which should help keep kids on their toes as they'll have to rely on their agility to stay upright as they scamper back and forth along the path. The nylon material that acts as a surface layer is soft on hands and easier to grasp. And the steel cabling beneath should help deter damages as potential vandals can't just cut through the rigging as they could with a traditional rope bridge. The Freestanding Curved Post Net Bridge is a great addition to outdoor locations where kids gather to play, from daycares and schoolyards to apartment complexes and city parks. If you'd like an alternate color scheme, just contact our sales staff to learn more about scheduling and other options.
