Use Zone: 14' 10" x 16' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Kids can't resist a playground spinning feature and the dazzling Freestanding Curved Post Overhead Spinner is no exception. This play element forces children to stabilize their center of gravity as they rotate, strengthening their core and improving body control. The spiral motion also tests grip strength as little ones hold on tight to stay on. With each revolution, children are progressing their depth perception and balance as they avoid the posts and hold their position steady. The simplicity allows for plenty of imaginative play. Each child can feel like a trapeze artist or Olympic gymnast as they use their body weight to twirl and watch the playground whirl around them. This developmentally appropriate activity is a favorite of many youngsters; spinning is in their nature! The powder-coat painted steel frame and ring are rust-resistant and built to last. Let us help you customize the spinner and contact AAA State of Play for color options.
