ASTM F1487-17

CPSC PUB #325

If you're seeking to bring a little bit of dynamic twirling action to your outdoors recreation site, look no further than Playground Equipment Dot-com's Freestanding Straight Post 3-Wheel Overhead Spinner. This robust playground product is built of galvanized steel and finished with a tough layer of powder coated paint. This makes the unit more than capable of handling years of habitual play and withstand the damaging effects of exterior weather. Kids will get a kick out of latching onto the upper wheels and using their momentum to whirl around in full circles while hanging in the air. As they play on the installation over time, school-age children will be improving their coordination and slowly building up arm and core strength. This is in addition to having loads of fun, of course! The Freestanding Straight Post 3-Wheel Overhead Spinner can be bought in the color scheme shown here or you can adjust it to alternate hues of your choice. Just reach out to a AAA State of Play salesperson to learn more.
