Use Zone: 12' 4" x 21' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Children will be quick to start swooping through the air on the hanging handle grips of the Freestanding Straight Post Curved Overhead Swinging Ring Ladder. This commercial-grade outdoor recreation product would be a fantastic installation to include at any playspace for school-age kids, including HOAs, municipal parks, and churches. Youth will get a natural thrill from temporarily being elevated while also engaging in a beneficial physical activity. Climbing is a proven method for boosting strength and building endurance, so it's critical site designers provide access to climbing equipment if they're wanting to help children during key stages of development. The overhead rings are each connected to the durable frame by a short length of chain, which lets kiddos use their own momentum to reach out and grab the next handle. This unit is purchasable with the hues shown or you can have the color combination altered to better suit an overall site plan. AAA State of Play customer service representatives are available to explain what additional color choices are currently available and inform you of potential lead times.
