**Capacity:** 2-3

**Use Zone:** 13' 4" x 20' 6"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Playground Equipment Dot-com's Freestanding Single Post Overhead Parallel Bar Climber is a streamlined physical activity unit that site designers can use to add a bit of activity diversity to their outdoor recreation location. The stationary overhead bars are built as a dual track to permit kids to haul themselves hand over hand past each other. This allows more children to play at once than a traditional single barred climber might. As school-age youth hang by their arms, they'll be boosting their strength development over time. A little bit of healthy living gets secretly mixed in with the amusing playtime, which is sure to make parents happy. The framework of the unit is constructed of hardy galvanized steel to ensure that the product can handle the weight of multiple users climbing on it for years. The exterior of the climber is finished with a tough powder coat paint application which ensures that your investment stays shiny, bright, and attractive. The colors can even be tweaked to better match your existing design. Just call or email us to learn more about further color options.
