Capacity: 4-8

Use Zone: 12' 4" x 21' 7"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Playground Equipment Dot-com's Freestanding Single Post Chain Wall Climber would make a fine addition to an outdoor recreation location, whether you're looking to add some independent play pieces to a municipal park, daycare facility, or church grounds. The reliable design features an arrangement of metal rungs held between vertical lengths of galvanized steel chain. The rungs offer an easy grip for children's small hands and their asymmetric spacing works with the natural alternating motion from left to right used when scaling elements like this one. School-age kids can ascend from either side of the unit and can either attempt to achieve their goal solo or face off in impromptu races against friends on the opposite face of the grid. The durable framework is also built of galvanized steel and the chains are embedded in the ground to allow a little bit of challenging sway without letting kids accidentally swing themselves into the straight posts on either side. This climber is available in the colors shown or you can have it altered to one of several other brilliant options. Please speak with a customer service representative to learn more.
