**Capacity:** 3-4

**Use Zone:** 13' 10" x 20' 6"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

---

Playground Equipment Dot-com's Freestanding Straight Post Tilted Pebble Bridge offers school-age children a manageable balancing challenge and would be a suitable activity installation for a hotel's exterior space, a town square, or a daycare center's grounds. The set of textured plastic pebbles are set somewhat askew and will require little hoppers to employ some agility and spatial reasoning if they're wanting to stay off the ground a safe distance below. The rotationally molded plastic steps are textured atop to enable better shoe grip. And the straight frame posts, overhead bar, and ground connected pebble supports are all constructed of rigid galvanized steel. This product will be easily able to handle kids hanging onto it for years. The Freestanding Straight Post Tilted Pebble Bridge can be purchased with this color scheme or we can change the hues to better harmonize with your venue. Just call or email us to learn more about this approach.
