COMPLIES With:

ASTM F1487-17

CPSC PUB #325

It's important to frequently clean and sanitize play equipment to ensure a safe and healthy environment for children. MaxxClean Multi Surface Cleaner and Sanitizer is a powerful but gentle cleanser useful for removing algae, bacteria, mold, and viruses from playgrounds to help keep them pristine longer. Simix uses an exclusive nano technology that harnesses power from the sun and artificial light sources to disinfect and sterilize. The non-bleach formula is environmentally-friendly and safe for use on most play surfaces, including wood. When mixed with water, the powder activates tough cleaning agents and deodorizers suitable for anything from carpet to concrete. The spray application makes for an easy and thorough cleaning process. This solution can be poured into a pump-style sprayer to cover large areas or a handheld trigger bottle to suit a smaller task. The MaxxClean Multi Surface Cleaner and Sanitizer is available in two sizes and the price includes shipping within the continental U.S. Important: This product is not appropriate for use on zinc-plated swing chains.
