

Stepping Stools - Log (Set of 5)

MSRP \$979.00

SALE \$882.00

Highlights:

- Made from recycled plastic with UV protectants
- Resembles the natural look of tree stumps
- Advances balance and coordination in children
- Available in two different colors

Age Group: 6 months to 5 years

No child can resist the urge to hop and walk along fallen trees and leftover stumps. So bring the fun of the forest to the playground! The Stepping Stools - Log (Set of 5) by Nature of Early Play can be added to playsets or installed as a stand-alone feature. These steps can also be used as seating and are designed to fit seamlessly into any playground, especially if it's nature-themed. The tops deceptively resemble a raw slice of wood but are actually made from Eco-Color plastic! The innovative use of recycled plastic materials is both environmentally-friendly and practical for playground equipment. By creating a natural look with the plastic materials, you can eliminate the risk of splinters or wood rotting while maintaining the aesthetic value. Stepping paths are ideal for improving balance, coordination and agility in young children. Additionally, they encourage imaginative play and creativity. Kids might pretend they are walking across raging rivers or hopping over spewing lava as they make their way from one side to another. The Stepping Stools are available in two colors, chocolate (dark brown) and latte (tan).
