

Field Force Lacrosse Training Backstop with Net

Price \$358.00

Highlights:

- Built with lightweight tubing for portability
- Rearrangeable panels to suit many needs
- Easy to breakdown and put together for travel
- Reduces the risk of balls causing injury or damage

The Field Force Lacrosse Training Backstop with Net is the perfect training tool for exercises, finishing drills and target training. The 1 ¼ inch steel tubing frames a high-density net that provides effective support for fast hits. It reduces the risk of injuries or damages caused by runaway balls by providing extra netting around the goal. This lacrosse net backstop is a very lightweight but durable piece of equipment that can be easily broken down and stored or placed in a bag for travel. This net is stabilized by the included ground anchors and is ideal for flat field surfaces. All of the panels can be easily rearranged at different angles and locations around the goal. The lacrosse goal is not included. Add it to an existing goal or take a look at our selection if you would like to complete a lacrosse training equipment set.
