

Base Pad for Square Basketball Posts

Price \$18.00

Highlights:

- Covers mounting hardware at base of square posts
- Available in several sizes to best match your basketball pole
- Appropriate for Youth, Recreation and NRSA play levels
- 2 inch polyurethane foam padding

Gared's Base Pad for Square Basketball Posts is a fitted protective cushion designed for installation around the bottom of a basketball pole. Inside the product is a polyurethane foam pad that's two inches thick. This foam is covered by an 18 ounce vinyl layer that provides the padding interior ultraviolet light protection and helps it resist water accumulation. This vinyl element (only available in black) contributes to the post pad maintaining a long life and helps prevent discoloration due to sun exposure. A 2-inch long strip of hook and loop type fastener keeps the pad stationed at the post base while also facilitating simple attachment and detachment. This Base Pad for Square Basketball Posts is a must buy if your basketball goals employ prominent anchor bolts or other protruding hardware. Nobody wants to see a player suffer a preventable injury! Usable inside or outdoors, this basketball safety device is purchasable in several different sizes. Make sure to learn the measurement of your basketball post(s) in square inches before selecting.
