Use Zone: 14' 8" x 9' 0"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Have a steep hill on or near your playground? The 22-foot Single Straight Hillside Slide turns an empty slope into a bonafide part of your playground. The Hillside Slide is built straight into a hill, which, when it comes to playground equipment, would be otherwise unusable. The slide is made from rotationally-molded plastic, meaning it can resist all manner of inclement weather conditions, as well as general wear and tear from prolonged use. Kids ages 2-12 will love sliding down to the bottom of the hill, a far more unique way of playing on than simply running or rolling down it. The 22-foot Single Straight Hillside Slide will prove to be a fun, memorable edition to your playground, and kids will spend hours going up the hill and down the slide again and again. This unique design incorporates the natural landscape into the play area, allowing kids to play while simultaneously enjoying the outdoors.
