Capacity: 9-12

Use Zone: 24' 1" x 23' 5"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Up, down, side to side. All sorts of climbing directions are possible with the A-frame Chain Climber. Utilizing galvanized steel bars held up by strong steel chains, the Chain Climber enables users ages 5-12 to climb, and can hold up to 12 climbers at once. The monkey bars at the top of the Climber can be accessed even by smaller children, who can use the steel bars on either side to step up and reach the monkey bars. Climbing is a great way for kids to develop their agility as well as building a sense of object permanence. The spacing encourages multiple kids to climb at once, promoting socialization and friendship-building. Spatial awareness is another important aspect of kids' development, and the A-frame Chain Tower Climber supplements this learning by placing climbing sections close to one another to make a challenge suitable for elementary-age children.
