The Pull and Dip Combo Station features four options to get a great workout with a variety of exercises. It's the perfect addition to any park or other public space geared towards fitness and health. By introducing this feature to your site, community members can work toward the improvement of their overall wellness by increasing cardio activity and fighting obesity. The variety of heights on this station allows any user to find the most comfortable position for their exercise. Some exercises that can be performed using this station include pull ups and chin ups, as well as using the dip bars to build chest, triceps and shoulder muscles. Improve your overall body strength and fitness level, as well as your physical and mental health with the Pull and Dip Combo Station. Go at your own pace, or make it a positive and sociable team exercise. Add this piece of equipment to your outdoor gym or green space today.
