Use Zone: 14' 1" x 21' 5"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Curved Helix Ladder provides a new look and feel to a traditional arch ladder. Utilizing three different access points for ambitious climbers, the combination of an arch and snake ladder provides children with a variety of places to climb and hang from. The curved helix-like arch on either side also offers different levels of difficulty depending on where a child decides to ascend or descend the climber. This helps improve grip strength and build muscles while children enjoy a play experience. This installment will provide a fun challenge to kids between the ages of 5-12, who can hone their decision-making skills as they choose where to step next. The Freestanding Curved Helix Climber will last many years with its powder-coated galvanized steel construction that resists rust and other weathering. With a variety of colors to choose from and a sleek, contemporary design, this element can easily fit into any new or existing play space.
