No matter the user's height, the Quadruple Inclined Chin Up Bars has you covered. Utilizing sturdy materials, including galvanized steel and rust-resistant powder coating, the Quad Chin Up Bars will last as a staple of your playground or outdoor fitness space for years to come. The Quad Chin Up Bars feature four different heights of chin up bars, as well as steel footholds on all four sides that help users reach the taller chin up bars. Additionally, for advanced users, the Quadruple Inclined Chin Up Bars can be utilized to perform a pull-up/push-up exercise on top of the bar, thanks to the structure's lack of enclosure or ceiling. Teens and adults need daily physical activity just like kids! With outdoor fitness stations like this, parents, guardians and older siblings can enjoy the benefits of play in a way tailored to their exercise needs and physical abilities. Outdoor fitness parks are a great investment for communities with adult and senior populations.
