ASTM F1487-17

CPSC PUB #325

A modern twist on the typical monkey bars design, the Roller Slide Table with Monkey Bars is a hybrid piece of playground equipment curated specifically for children ages 2-5. The low elevation of the Slide Table means that even the smallest children will have no problem reaching the monkey bars. Additionally, the slide rollers serve as a helpful supplement for kids who may not be ready to traverse the monkey bars without assistance. This is perfect for children with disabilities or challenges with mobility. Whether kids wish to play on the slide roller or swing along the monkey bars, the Roller Slide Table with Monkey Bars accommodates all play styles, and can handle 2-5 children at play simultaneously. This element promotes beneficial strength conditioning and agility during play. Add the Roller Slide Table with Monkey Bars to your playground, and kids who use it will surely be delighted and entertained every time they play.
