ASTM F1487-17

CPSC PUB #325

The Six Panel Standard Wall Climber is a fun and unique product to challenge kids' cardiovascular endurance and build on other skills like spatial awareness, motor skills, and memory. This equipment is sure to encourage social interaction and play, featuring several panels to choose from and a max capacity of 15-18 kids. The panels are double sided, providing children twelve different areas to begin their ascent, and connect in the center to a vertical galvanized steel post. Adding this wall climber to your outdoor site will ensure that it plays a key role in any young child's development. Climbing is a way for children to improve their spatial and directional awareness, as well as boost physical and mental skills like foot and hand coordination. Kids can use their problem solving skills to figure out where to step next, and build on their agility and balancing skills. Add this wall climber to either your school, park, church or other outside site.
