MSRP \$650.00

SALE \$553.00

Highlights:

- Lid and liner are sold separately
- 32 gallon capacity
- Colors are customizable
- Finished with a layer of textured polyethylene

The Perforated Style Trash Receptacle by Webcoat is built of strong and durable steel whose surface is punctuated with a handsome pattern of dotted holes. This makes the waste bin tough enough to handle usage in a variety of locations while still being attractive enough to match any number of contemporary sites. With its ample 32 gallon capacity, this unit is ready to help keep unsightly litter from accumulating at your office park, playground, or town square. The receptacle is coated in a durable and resistant textured polyethylene that is available in various hues, just speak to a AAA State of Play salesperson to learn more about alternate choices and scheduling opportunities. The textured polyethylene material used in the coloring process will help keep your trash bin look bright and eye-catching against years of sun and rain exposure. This trash receptacle is purchased as a portable unit. Optional In-ground and surface mounting equipment is sold separately.
