**Use Zone:** 12' 2" x 18' 0"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Simple to install, the Freestanding Chain Ladder Climber is a unique piece of fitness equipment that works out children's upper and lower body muscle groups. The wide, rectangular frame of the Freestanding Chain Ladder Climber is made from sturdy steel pipes, and within the frame resides the signature metal climbing net. The steps on this climber serve as both hand grips and footholds, which kids will use to stabilize themselves on their way up or down the climber. The metal also serves to anchor down the metal climbing net, meaning it won't move around too much when multiple kids are climbing. Speaking of which, thanks to the dual-sided nature of the Freestanding Chain Ladder Climber, it's usable from either side. Kids can climb and have fun with their friends while also improving strength in important muscle groups.
