CPSC PUB #325

The Kids Parallel Rock Climbing Wall is another addition to PlaygroundEquipment.com's line of kids' fitness equipment. Playground designers would be wise to incorporate equipment into their playground that promotes body control and physical strength, and the Kids Parallel Rock Climbing Wall delivers in both regards. Both the front and the back of the Kids Parallel Rock Climbing Wall contain various knobs and footholds that allow multiple children at once to get in on the climbing action. As children climb up and down, they'll be exercising key muscle groups such as the latissimus dorsi and forearms, while also honing their gross motor skills. Since the footholds and knobs are placed at varying heights, kids of all sizes and physical ability levels can use the Kids Parallel Rock Climbing Wall to its fullest potential.
