SALE \$252.00

Highlights:

- Colorful border and detailing
- Made from shatter-resistant acrylic
- Helps toddlers develop facial recognition skills
- Can be displayed vertically or horizontally

Unit Size: 36" x 18"

Developing sensory skills and facial recognition is vital for infants and toddlers, and the Sunny Meadow Mirror delivers the means to do both. The glass of the Sunny Meadow Mirror is constructed using shatter-resistant acrylic, which keeps kids safe and helps avoid situations where kids may otherwise cut themselves on the glass. Additionally, since the border, flower, and sun details are all printed on the back, they won't scratch off or wear with time. The Sunny Meadow Mirror can be displayed vertically or horizontally, depending on the needs of your classroom, and is also great for social interaction, as multiple kids can look into and use the mirror at the same time. Some light assembly is required for the Sunny Meadow Mirror, which measures 36" by 18". Contact a sales representative for more information on this great classroom furnishing.
