The bipod swing frame is a traditional playground structure with two posts supporting each end, forming a bipod. The swing is available standard with galvanized posts. Powder-coat painted posts may be substituted at an up-charge. Contact live support for more information. Each bipod swing bay includes a set of chain and belt seats for creating a safe and appropriate playground activity. As with all our swingsets, all necessary hardware and s-hooks for a complete installation is included. The dimensions are as follows: 2-3/8" legs, 2-3/8" top rail, 8' installed height. The fittings (joint connectors) are available painted at no additional cost.
