The High-Capacity Large Adaptive Swing Seat allows those of varying mobility levels to have fun on the playground with the rest of their peers. One of our most highly-requested designs, the High-Capacity Large Adaptive Swing Seat offers safety and support that's geared especially towards adults with disabilities. The High-Capacity Large Adaptive Swing Seat includes hardware, chains, and a harness; it also holds up to 300 pounds, making it ideal for people who may otherwise have trouble finding suitable equipment to play on. Those with disabilities often struggle to find playground equipment that accommodates their individual needs; thanks to its high weight capacity and inclusive design, the High-Capacity Large Adaptive Swing Seat can alleviate some of this struggle while helping to foster a fun, safe environment for all. This seat requires an 8 foot high swing bay and an unimpeded 96-inch wide top rail. Check out our Single Post and Arch Post Adaptive Swings, designed to perfectly accommodate the Adaptive Swing Seat.
