Fit with a High-Capacity Adaptive Seat, this version of our Elite Series 3.5 inch Arch Post Swing is a unique take on the traditional swing seat. The High-Capacity Adaptive Seat allows children and adults with disabilities to swing to their hearts' content, and with a maximum weight capacity of 300 pounds, the Elite Series 3.5 inch Arch Post High-Capacity Large Adaptive Swing can accommodate a wide range of users. Whether they're kids, teenagers, or adults, people with disabilities often struggle to find playground equipment to accommodate their specific needs. With the Elite Series 3.5 Inch Arch Post High-Capacity Large Adaptive Swing, playground-goers will gain a new, exciting swinging experience that's eminently usable by those with disabilities, and thanks to its inclusive design, it's sure to make your playground a more inclusive environment for all, regardless of ability level.
