Highlights:

- 32-gallon capacity reduces frequency of bag changes
- Perfect for outdoor use
- Includes plastic liner
- Three different mount options

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Affordable, durable, and convenient, the Expanded Steel Trash Receptacle will add a way for guests in your outdoor space to throw away their trash rather than littering. The Expanded Steel Trash Receptacle includes a plastic liner, which is able to accommodate large trash bags with ease. For those who wish to relocate the unit, this receptacle is capable of utilizing a portable mount, while those who wish to make the receptacle a more permanent fixture can take advantage of the inground or surface mounts. The punched steel inlets that characterize the Expanded Steel Trash Receptacle allow it to be significantly lighter than conventional steel receptacles while adding an interesting visual element. This receptacle has a capacity of 32 gallons, leaving it more than enough room to hold large amounts of trash.
