Fall Height: 16" or less install height

Use Zone: 13' x 13'

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Great for developing balance and coordination, the Single Pebble is a great component for children who love stepping up and towering above their peers. When arranged in a group, the Single Pebbles make ideal balance equipment, as kids can step or hop from one pebble to the next. Additionally, multiple Single Pebbles can be utilized as bridges connecting one piece of equipment, such as a play structure, to another, such as a swing set. Since the design of the Single Pebble accommodates 16 inches for in-ground mounting, buyers are able to place multiple Single Pebbles at varying heights, thereby adding a layer of challenge and excitement to kids' playground experience. The Rainforest Green finish of this Single Pebble as well as its red post make it easy to fit it right in with the existing color scheme of most playgrounds.
