Age Group: Adult

Footprint: 5' 3" x 2' 11"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

Improve your posture and increase your strength with the Accessible Double Lat Pull Down, great for users of all ages and ability levels. Since we use our back muscles constantly, they're a crucial part of a healthy body. However, it's common for people to ignore muscle groups like the Latissimus Dorsi (commonly referred to as 'lats'), and thereby increase their chances of injury. Particularly for those who are wheelchair bound, back strains can hamper quality of life, making it all the more important to exercise back muscles and keep them strong. The Accessible Double Lat Pull Down helps those of all ability levels to exercise their lats and maintain a strong posterior chain. The space-saving design of this machine makes it perfect for outdoor fitness circuits, and its in-ground mount increases its durability and longevity.
