ADA Compliant

Made from five coated steel platforms of varying heights, the Assisted Step Up Platforms with Rails comprise a unique piece of outdoor fitness equipment that's great for teens and adults with mobility-related challenges. The importance of mobility and flexibility is paramount for adults, particularly those with disabilities, and the Assisted Step Up Platforms with Rails provide a straightforward way for these adults to improve their motor skills. Regardless of age, those who've recently suffered leg or back injuries can benefit immensely from the sort of straightforward, low-intensity exercise that outdoor fitness equipment such as this unit can facilitate. The Assisted Step Up Platform with Rails can also serve as an effective connector between pieces of fitness equipment, allowing users to seamlessly move from one exercise machine to the next.
