Leg Day is a vital component of any fitness regimen, and the Single Leg Press is the perfect piece of outdoor fitness equipment to make it complete. Since the Single Leg Press involves no weighted resistance mechanism, even beginners can use it to exercise their lower body. What's more, the Single Leg Press is compact enough to fit into relatively small outdoor spaces, making it the perfect component for an outdoor fitness circuit. With regular use, the Single Leg Press will deliver tangible results, leaving users feeling stronger than they felt before. Constructed from high-quality, durable steel, the Single Leg Press is capable of withstanding even the harshest of inclement weather, and thanks to its inground mount, it will stay anchored into the ground, and remain a staple of your outdoor fitness circuit for years to come.
