

Adjustable Timber Sleeve (8" / 12" high)

MSRP \$70.00

SALE \$48.00

Highlights:

- Comes in 8" or 12" height
- Great for creating custom playground borders
- Helps enclose play spaces
- Helps keep surface material within play spaces

When it comes to playground planning, and especially when using playground timbers, it's not uncommon to run into situations where initial measurements for an enclosed play space are slightly off. In these cases, it helps to have Adjustable Timber Sleeves. A niche but sometimes necessary playground amenity, an Adjustable Timber Sleeve allows you to create a custom length playground border. Simply by cutting one full-size border timber and sliding an Adjustable Timber Sleeve over the timber's cut end, you're able to effectively reduce or extend the length of your playground timber so it more effectively encloses your play space and creates a seamless finish for your outdoor play area. These Adjustable Timber Sleeves are available in heights of 8" as well as 12", making them a useful tool for various playground setups.
