Fall Height: 12"

Use Zone: 13' 3" x 13' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Small and compact, the Whizzy Dizzy is a unique piece of playground equipment that features a spinning platform. Despite its relatively small appearance, it offers a boundless source of amusement for kids. It operates similarly to larger spinning equipment like merry-go-rounds, but is designed for optimal use by a single child or two at most. To get started, the user will place one foot on the circular platform and use the other foot to push off the ground, relying on centrifugal force to continue spinning. For safety, there are three handrails attached to the central pole. Unlike a traditional merry-go-round, the Whizzy Dizzy is lightweight and easy for a single child to set in motion with a significant amount of force. With the help of a buddy, they can potentially spin even faster with a bit of coordination and teamwork.
