Footprint: 3' 4" x 7' 1"

Use Zone: 14' 8" x 7' 0"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

With the 3-foot Single Straight Hillside Slide, you can turn any slight embankment into a slide that children will flock to. Built straight into a hill, this unit makes for a great way to utilize terrain that may otherwise be unusable. Because the Hillside Slide hugs the hill's surface, it effectively prevents kids from falling and hurting themselves, as the distance from the end of the slide to the ground below is minimal. The crest of the slide is kept stable with a galvanized steel deck, which is anchored into the ground with two posts of the same material. The rotationally-molded plastic that comprises the slide makes it weather-resistant and ideal for daily use. This slide will appeal greatly to preschoolers, who often are just getting their bearings on the playground.
