COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

For kids who want to have a blast while at play, Rocket Blast Indoor Playground has just the combination of play elements to satisfy their desire for activity. When one thinks of activities often found at daycares or schools, amenities like activity panels, slides, and towering play structures come to mind. However, Rocket Blast brings all these entertaining items and more under the roof of one's school, daycare, or other building in which little ones enjoy playing. Starting on the ground level, the Sneaker Keeper is a simple yet useful cubby hole shelf that allows children to store their belongings and avoid potential tripping hazards. Once kids ascend the 6-Level Deck Climb, they're able to traverse the T-Tube Crawl Tunnel as well as the Wave Crawl Tunnel, both of which make great hangout spots for kids to commiserate with their friends. The main attraction of Rocket Blast is the Enclosed Hook Tube Slide, which brings children down to the ground to begin the fun anew. Please note: Surfacing tiles and ramps not included.
