Replete with thrilling play elements, Slides of Life is a brilliant addition to indoor playgrounds everywhere. Indoor playgrounds are gaining popularity across the country, and it's no secret why: they allow children to get active and creative in a safe indoor environment in which they can be easily supervised by adults. Starting on the ground level, Slides of Life offers a Tic-Tac-Toe Activity Panel, perfect for stimulating young minds and spurring collaborative play. The three slotted panels that adorn Slides of Life function as windows to the outside world, letting children wave to their peers and peer out at their surroundings. The 3' Triple Rail Slide is the main attraction of Slides of Life, and little ones will have the thrill of a lifetime as they return back down to the ground. There's no shortage of fun to be had aboard Slides of Life, and adult caregivers will appreciate its open-ended nature. Please note: Surfacing tiles and ramps not included.
