ASTM F1487-17

CPSC PUB #325

ADA Compliant

As the name suggests, Palace of Play contains a multitude of different play elements that kids are sure to enjoy. Indoor playgrounds are a wise investment in many different settings, including schools, daycare centers, and other indoor areas where children frequent. On the ground floor, the Sneaker Keeper helps kids organize their sneakers and other belongings in a way that doesn't turn them into tripping hazards for their peers at play. The Tic-Tac-Toe Panel encourages collaborative, friendly competition among children, and the dual-sided nature of it makes it an intuitive choice for kids in or out of the Palace of Play. Moving on up, kids will find a Gyro Activity Panel as well as a Ball Turn Panel, both of which will further stimulate the minds of inquisitive young ones. Lastly, the Turbo Helicopter allows children to imagine they're the pilots of a roving helicopter, far above the clouds. Please note: Surfacing tiles and ramps not included.
