Capacity: 13

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

Compact yet chock full of exciting features, Park of Pizzazz is an indoor playground that kids will be excited to use. In many parts of the country, having year-round outdoor recess simply isn't realistic, and it's in these cold, dreary months that kids often become restless and eager to exercise their bodies and minds. With indoor playgrounds, recess can be brought inside, along with all of children's favorite aspects of play structures. With Park of Pizzazz, the fun starts at the ground floor with the Ball Turn Activity Panel and the Gyro Activity Panel. These panels help to entertain kids as well as improve their hand-eye coordination. Moving up the 7-Level Deck Climb, little ones can take advantage of the T-Tube Junction to hang out with their friends, as well as the Enclosed Spiral Tube Slide, which helps them get right back down to the ground level. Please note: Surfacing tiles and ramps not included.
