CPSC PUB #325

ADA Compliant

Made especially for kids who'd otherwise have difficulty using typical playground swings, the Elite Series 5 inch Single Post Child Adaptive Swing 8 foot stands at 8 feet in height, and is a must for any playground space with children at play. This swing set has been designed to take up minimal space, and its sturdy, 5 inch single posts are designed to stand the test of time. With the outdoor elements taking their toll on outdoor playground equipment, it's important to buy equipment that will last for years to come, and the Elite Series 5 inch Single Post Child Adaptive Swing 8 foot is exactly that sort of playground equipment. Additionally, the Child Adaptive Swing Seat adds a layer of inclusivity and accessibility to the playground, allowing kids of varying ability levels to get out and swing to their hearts' content.
