With the Ney Ney Infant Play Center, kids can play with the ponies and let their imaginations run wild as horses. This outdoor playset is specifically designed for children ages 6 to 23 months, and with the amount of activities built into it, children will have no problem finding something fun to do. The activity panels within Ney Ney include the Infant Photo and Mirror Panel, which offer a lovely picture of a wild horse, as well as a mirror in which they can see their own smiling faces. Meanwhile, the Infant Chickadee Chimes Panel allows children to make music for the whole playground to hear. Lastly the Infant Geo Shapes Panel facilitates helpful learning for young ones who are just starting to learn about geometric shapes. The Chute Scrambler is a small slide that brings little ones back to the ground, where they can walk around and begin the fun anew.
