- Great for preschoolers and toddlers
- Steel bars help kids step up onto the sandbox

Age Group: 2 to 5 years

Assembled Dimensions: 84" × 54"

ADA Compliant

Ideal for playgrounds frequented by preschoolers and small children, the ADA Sandbox is designed so all kids can enjoy a fun time playing in the sand. What makes the ADA Sandbox different from a conventional sandbox is the ADA platform attached to it, which enables wheelchair-bound children to transfer themselves from their wheelchair to the sandbox. The ADA Sandbox is deep, with a capacity of 15 cubic feet of sand, so more than one child can get in on the fun and build sandcastles. Kids will have the time of their lives envisioning themselves on the beach, and the ADA Sandbox makes for a great summertime activity. There's no shortage of sensory play to be had in the ADA Sandbox, and it works especially well with other playground equipment such as swings and slides.
