It is always a great idea to teach kids early on how to responsibly take care of the environment and clean up after themselves. The sooner good habits are formed in life, the more likely it is that children will carry it on throughout their lives. This Kids Trash Receptacle is absolutely perfect for this purpose, and is specially designed and sized to fit into your child's space with ease! Teach them to clean up after themselves and make the world a better place by providing a place for them to throw away their garbage or recycle their supplies. It is easy to reach, and comes fully assembled. This trash receptacle is also ADA accessible, and is made from recycled structural plastic and stainless steel hardware. This is a great addition to any playground, outdoor classroom, or anywhere else you need an extra trash receptacle that is easy to reach and access for a child.
