---

Built for comfort and leisure, the Charleston Bench provides up to eight feet of resting space for park and playground patrons. Featuring a sleek, thermoplastic finish covering a 1.5-inch thick cast aluminum frame, the Charleston Bench is sturdy and strong enough to accommodate visitors for years to come. The vertical slats of this bench allow appropriate airflow on hot days, and its customizable length makes it a great fit for spaces big and small. Its five different color options allow one to buy the best color bench to fit into their outdoor space. The back of the Charleston Bench rests at an angle, which allows park patrons to sit back, relax, and observe the natural world around them.
