Use Zone: 15' x 19'

The Junior Double Panel Climber is a fun and easy climbing wall designed to help develop climbing skills in children age 2-12. This climbing wall is a great addition to any playground, daycare center, or recreation center where younger kids play. The 5-ft climbing panels are polyethylene and have oval shaped holes to make climbing easy and enjoyable for even the newest climbers. The panels are connected to durable posts designed for durability and stability and this unit can withstand heavy use for a number of years. Kids love the double panel design that allows a number of kids to play on the unit at one time. While playing on the Junior Double Panel Climber, children are exercising their muscles while enjoying playtime. This playground climber complies with CPSC and ATSM playground safety regulations.
