A great choice for larger playground with high volume use is the Mountain Deluxe Tortoise Climber. This commercial playground climber can support the weight of over 30 children; the strength of this unit is derived from the rotationally molded Tortoise climbing panels and its strong geometric shape. Kids love playing on this huge piece of playground equipment, and stay entertained for hours because of the many climbing routes created by the hand and foot holes in the climbing panels. Kids also enjoy crawling underneath the mountainous structure gaining access to it via open spaces at the bottom of the dome. This climber is sure to be the centerpiece at any commercial use playground; it keeps kids excitedly playing while they also get a tough workout. This dome is both ASTM and CPSC compliant, as Sii is devoted to child playground safety and strictly follows to all rules and regulations.
