The Open Dome Plastic Climber configuration creates an arched bridge of Tortoise panels that kids find exciting and enjoyable. Kids develop excellent climbing skills and increase physical fitness play on this piece of playground equipment. The rotationally molded Tortoise climbing panels are designed with hand and foot holes that make climbing this massive climber easy. Kids can climb over, under, and run through the open dome, which adds cardiovascular exercise to the fun workout. This climber is ideal for kids age 2-12 and is sure to be the centerpiece on any commercial playground. The Open Dome Plastic Climber is compliant with commercial playground equipment regulations and playground safety rules. This climber is designed to be in-ground mounted. This climber ensures that playtime is a blast for children, and encourages life-long healthy habits.
