The Freestanding 360 Degree Orbital is an outstanding piece of playground equipment designed to handle heavy use in busy parks, playgrounds, and schools. Designed for kids from 5-12, this playground climber has a number of challenging features including a circular ring of overhead monkey bars and ladders. The climber is a great way for kids to develop their strength while having fun and interacting with others. The overhead circular monkey bars will increase upper body strength and agility in children. Physical fitness is important in children; the Freestanding 360 Degree Orbital is a perfect way to make fitness fun. The unit follows ASTM and CPSC playground safety guidelines, and a safety surface should be installed to prevent any injuries that might be caused from falls.
